# Information about investments and management

## Classification

International Equities

75% minimum exposure to international equities from emerging countries or members of the OECD or non-OECD countries that have a connection with the markets of Asia, Latin America, the Caribbean, Eastern Europe, the Middle East, or from Africa. The fund will invest in stocks of all capitalisations and from any economic sector. Up to 10% of the fund may, however, be reserved for investment in small and mid-caps.

## Procedures for determining and allocating distributable sums

Net income for the financial year is equal to the amount of interest payments, arrears, dividends, premiums and prizes, attendance fees and all income from the securities held in the sub-fund's portfolio plus income from sums currently available minus management fees and borrowing costs.

The amounts available for distribution are equal to:

1. Net income plus retained earnings, plus or minus the balance of accrued income;
2. Capital gains, net of fees, minus capital losses, net of fees, recognised in the financial year, plus net capital gains of the same type recognised in previous financial years which have not been distributed or capitalised, minus or plus the balance of accrued capital gains.

Distributable amounts are fully capitalised, except for amounts subject to distribution required by law.

## Management objective

GemEquity is a dynamic fund seeking long-term performance through exposure to securities mainly from emerging countries (Asia, Latin America, the Caribbean, Eastern Europe - including Russia and the countries of the former USSR, Middle East, Africa) ) by investing at least 90% in stocks selected on the basis of extra-financial criteria according to an SRI methodology, arising from long term trends affecting society and the economy by taking into account environmental, social and governance ("ESG") considerations.

## Benchmark

The performance of the GemEquity sub-fund can be compared to the MSCI Emerging Markets Index (USD), net dividends reinvested. Calculated by MSCI, this index is weighted by market capitalization and considers the performance of the various emerging market exchanges in the broad sense.

The Bloomberg code of the benchmark index is: NDUEEGF Index HP

The index is converted into EUR for EUR class shares and directly expressed in USD for USD class shares. This conversion into EUR may have an impact on the management objective (as well as on the outperformance fee).

Since the management of the sub-fund is not index-based, the fund's performance may differ substantially from the benchmark index, which is used only for comparison purposes.

## Investment strategy

### Strategies used

The management is oriented towards the emerging equity markets, with a willingness to take advantage of the long-term trend of rising purchasing power of these countries.

GemEquity sub-fund is managed according to a rigorous selection of securities, known as stock picking, through a process that involves direct meetings with the companies in which the sub-fund invests.

The sub-fund invests in stocks selected based on extra-financial criteria according to the SRI method by systematically integrating environmental, social and governance (E.S.G.) factors into financial investment.

At least 90% of the stocks in the portfolio have obtained an ESG rating by the fund management company or one of its non-financial data providers.

The examples of indicators selected for each of the E, S and G criteria are as follows:

- Environmental indicators: environmental policy and actions, results of action plans implemented by the company, carbon footprint, exposure of suppliers to environmental risks, positive or negative impact of products on the environment.
- Social indicators: training hours per employee, employee loyalty (turnover rate), anti-discrimination efforts (feminization rate), average salary, proportion of temporary workers.
- Governance indicators: competence of the management team, number of independent directors, shareholders quality / profile, feminization of the board of directors.

The sub-fund endeavors, through a so-called "best in class / best in progress" approach, to select well rated companies and/or those who have demonstrated substantial improvements from the extra-financial point of view. The sub-fund applies two extra-financial filters to its stock selection: after exclusion of controversial sectors and practices, the candidate company must comply with the minimum ESG rating.

The ESG investment process applied, excludes the 20% of the lowest rated companies in each sector from the investment universe. These ratings are determined internally by the fund management team for all stocks in our investment portfolio. Given our frequent exchanges with these companies, we believe that we are particularly well positioned to perform these ratings. For stocks not included in the portfolio, especially those who are benchmark index components, the ratings are based on Sustainalytics' recommendation.

The GemChina sub-fund has been awarded French government SRI label.

In addition to sectoral and thematic research carried out internally, fund managers also rely on extra-financial data provided by data specialists: Sustainalytics (for extra-financial data), Trucost and CDP (for carbon footprints).

In the event that a company's rating drops below the minimum required for the sub-fund by the fund management company, the position in the issuer shall be liquidated within a maximum period of three months in the best interests of shareholders.

The main methodological limitation of the extra-financial strategy is that the fund management company relies on the data providers such as Sustainalytics, and Trucost and CDP to determine the internal rating.

For further information on the rating methodology implemented in the sub-fund, investors are invited to consult Gemway Assets Transparency Code available on the website [www.gemway.com](http://www.gemway.com)

The investment strategy aims to eliminate sustainability risk

This sub-fund is classified under Article 8 of the European Regulation (EU) No 2019/2088 ("Disclosure Regulation"). Sustainability risk is measured for each issuer and/or UCI concerned on the basis of a set of criteria on the Environmental, Social and Governance pillars that may have an impact on its valuation due to the level of financial risks they represent (including physical and transition risks related to climate change and, progressively, risks related to biodiversity). These criteria cover both endogenous and exogenous factors.

The results of this assessment are made available to managers so that they can consider the impact of their investments on the change in the level of sustainability risk in their portfolios.

The level of likely impact of sustainability risks on the performance of this Fund has been assessed as: Low

### **“Information: Regulation (EU) 2020/852 known as “Taxonomy”**

The European Union Taxonomy (Regulation (EU) 2020/852) (hereinafter the “Taxonomy”) aims to identify economic activities considered environmentally sustainable.

The Taxonomy identifies these activities according to their contribution to six major environmental objectives:

- mitigation of climate change.
- adaptation to climate change;
- sustainable use and protection of water and marine resources;
- transition to a circular economy (waste, prevention and recycling);
- prevention and reduction of pollution;
- protection and restoration of biodiversity and ecosystems.

In order to be considered environmentally sustainable, an economic activity must demonstrate that it makes a significant contribution to the achievement of one or more of these six objectives while not harming the achievement of the others (principle of no significant harm). For an activity to be compliant under this taxonomy, it is also necessary that it respects internationally guaranteed social and human rights (the minimum social guarantees).

The Sub-Fund is able to contribute to the achievement of these objectives of economic and social sustainability through its investments and integrates the Taxonomy into its investment decision-making process without however constituting a sustainable investment according to the definition of Regulation (EU) 2020/852.

However, both the construction of the portfolio and the technical verification criteria limit the possibilities of evaluating the contribution to environmental objectives and prevent any evaluation of the contribution to social objectives.

Furthermore, the lack of information provided directly by the issuers as well as the shortcomings of the calculation methodologies do not for the moment make it possible to guarantee the accuracy, precision and comparability of the information communicated, it is not expected at this stage that a minimum proportion of the Sub-Fund's assets are aligned with the criteria of the European Taxonomy.

The other investments underlying this Fund do not take into account the Union criteria European Commission on environmentally sustainable economic activities.

A periodic report relating to extra-financial characteristics is made available to investors.

If necessary, add: For any further information, please refer to the ESG policy on our website at [www.gemway.com](http://www.gemway.com)

A case-by-case fundamental analysis is then carried out, focusing mainly on five criteria, which are:

- the quality of the company management,
- the quality of its financial structure,
- visibility on the company's future earnings and especially its ability to produce sustainable Free Cash Flows in the future,
- growth prospects in its line of business,
- and the speculative aspect of the security.

The selected files are thus subject to a very selective and qualitative process, but the investment strategy also integrates a macroeconomic approach in order to refine the asset allocation.

The GemEquity portfolio comprises a selection of 40 to 80 different stocks.

The selected files were subject to a very selective and qualitative process.

The investment strategy focuses on selecting securities that offer the best current or potential growth and are leaders on major markets in the emerging geographical areas. This approach leads naturally the investment manager to invest mainly in companies able to generate sustainable and growing Free Cash Flows at the expense of cyclical stocks.

The stocks will essentially be large caps. However, the fund reserves the right to select small and mid-caps (under USD 1 billion) within a limit of 10%.

GemEquity has exposure of at least 75% to markets of emerging and eurozone countries and/or international equity markets.

Depending on market trends and situations, GemEquity may also invest up to 25% of its net assets in bond securities, mainly issued by States, deemed to be investment grade bonds, i.e. rated at least BBB- by Standard & Poor's or equivalent.

Lastly, within the context of its cash management, the fund reserves the right to invest:

- up to 25% of its assets in investment grade negotiable debt securities
- in units or shares of French or European UCITS and AIFs or investment sub-fund meeting the criteria set by the Monetary and Financial Code within the limit of 10%.

GemEquity may use derivative instruments as part of equity market risk hedging and exposure and/or as part of currency risk hedging.

It is specified that the fund may be exposed to up to 100% in currencies other than the euro. The main currencies to which it will be exposed are the Hong Kong dollar, the US dollar, the Brazilian real, the Indian rupee, the Russian rouble, the South African rand, the Korean won, Chinese renminbi, Japanese yen, Saudi riyal, Taiwan dollar, Philippine peso, Thai baht, Malaysian ringgit and Singapore dollar.

The financial product is not required to take into account the negative impacts currently and given the geographical area concerned, i.e. emerging countries, the information is not available with as much transparency as in the area where the publication legislation is in force. However, the financial product undertakes not to invest directly in coal exploration companies. Companies involved in the exploration and production of unconventional fossil fuels are also excluded, with a tolerance threshold of a maximum of 5% of turnover.

The financial product collects and tracks more than 15 environmental and social indicators such as Scope 1, 2 and 3 greenhouse gas emissions; carbon footprint ; carbon intensity; dangerous waste ; water consumption ; water recycling; violations of the principles of the United Nations Global Compact and the guidelines of the Organization for Economic Co-operation and Development (OECD) for multinational enterprises; pay gap between men and women; additional health coverage.

The financial product also undertakes to maintain the carbon intensity measured by the WACI 20% below the level of the benchmark index.

### **Assets (excluding derivatives)**

#### **Equities**

GemEquity is constantly exposed to 75% equity risks through investments in the shares of companies listed mainly in emerging countries (Asia, Latin America, the Caribbean, Eastern Europe, the Middle East and Africa). The fund may also be exposed to equity risks through investments on the international equity markets of OECD and non-OECD countries, as well as on markets which are not in emerging countries, and which are linked to the markets of emerging countries.

The fund will invest in stocks of all capitalisations and from any economic sector. Up to 10% of the fund may, however, be reserved for investment in small and mid-caps.

The securities selected may or may not have voting rights.

#### **Debt securities and money market instruments**

Within a limit of 25% in accordance with its investment strategy, the fund may invest:

- in negotiable debt securities of unrestricted duration receivables, with fixed or variable rates.
- in bonds of unrestricted duration, with fixed or variable rates. Within this framework, special attention is given to the credit quality of corporate issuers of such securities. Eligible securities are “investment grade”, they have a minimum BBB rating according to Standard & Poor’s or equivalent.

Management sets no limits in the breakdown between sovereign and private issuers. The manager does not set any particular constraints with respect to the geographical areas of the issuers but will prioritize investments into leading international markets.

The ratings mentioned above are those used by the manager at the time of the initial investment. If a rating is downgraded over the life of the investment, the manager will conduct a case-by-case analysis of each situation and decide whether or not to maintain the position concerned. As a result, the investment limits defined according to the assessment of credit risk by the rating agencies may be slightly adjusted in accordance with the management team’s own analysis. As a result, the investment limits defined according to the assessment of credit risk by the rating agencies may be slightly adjusted in accordance with the management team’s own analysis.

Information relating to the financial guarantees of the UCITS:

In the context of temporary acquisitions and sales of securities and OTC derivative transactions, the UCITS may receive securities and cash as collateral. The cash collateral received is reinvested in accordance with the applicable rules. Securities received as collateral may not be sold, reinvested or pledged as collateral. These securities must be liquid, transferable at all times and diversified and must be issued by high quality issuers that are not an entity of the counterparty or its group.

#### **Ownership of units or shares in other UCITS or investment compartments**

The sub-fund may hold up to 10% of its assets in the following units or shares of the following UCITS or investment sub-fund:

- French or foreign UCITS
- French or European AIF or investment sub-fund meeting the criteria set by the Monetary and Financial Code.

These UCITS and investment sub-fund may invest up to 10% of their assets in UCITS or AIFs or investment sub-fund. They can be managed by the management company

### **The derivatives used to achieve the management company objective**

#### **Derivative financial instruments**

The sub-fund is entitled to operate on forward financial instruments traded on international regulated markets, unregulated and/or over-the-counter markets to expose and/or hedge the portfolio at the risk of the equity or currency risk.

Derivative instruments may also be used to make adjustments to the portfolio in the event of significant subscription/redemption transactions. Overall exposure (directly owned securities and forward instruments) to equity markets may not exceed 100% of the net assets.

Type of the markets where the fund operates:

- ⇒ Regulated
- ⇒ Organised
- ⇒ Over the counter

Risks in which the manager decides to operate:

- ⇒ Equity
- ⇒ Currency

Type of operations:

- ⇒ Hedging: currency, equity
- ⇒ Exposition: equity

Type of the instrument used:

⇒ Futures: on indexes

⇒ Options: index, equity and foreign exchange (currency)

⇒ Foreign exchange forward: purchase and sale of currencies

Strategy using derivatives to achieve the management objective:

⇒ Total or partial portfolio hedging

⇒ Reconstitution of synthetic exposure to assets and risks (equity, currency)

The underlying will be important indices representative of the geographic areas or countries the fund invests in.

Financial instruments are entered into with intermediaries selected by the management company who have no power over the mix or management of the SICAV's portfolio.

#### Securities with embedded derivatives

The manager may invest in European and/or international convertible bonds, particularly in the emerging countries.

The manager may invest in securities with embedded derivatives (warrants, subscription certificates, convertible bonds etc.) traded on euro zone and/or international regulated or over-the-counter markets.

In this regard, the manager may take positions to hedge and/or expose the portfolio to business sectors, geographical areas, interest rate, equities (all types of capitalisation), foreign exchange, securities, etc. in order to achieve the management objective.

The use of securities with embedded derivatives, rather than other derivative instruments mentioned above, shall be justified notably by the manager's aim to optimise hedging or if necessary, to stimulate the portfolio by reducing the cost associated with the use of these financial instruments in order to achieve the management objective.

In all cases, investments in securities with embedded derivatives must not exceed 20% of the net assets.

#### **Deposits**

Nil

#### **Cash borrowing**

The fund may borrow cash. Without aiming to be a structural cash borrower, the fund may find itself in a debit position due to transaction-related cash flows (ongoing investments and divestments, subscription/redemption transactions, etc.) up to a limit of 10% of the net assets.

#### **Temporary purchase and sale transactions**

Nil

#### **Use of Total Return Swap**

Nil

#### **Risk profile**

list of risks below is not exhaustive: it is the investors' duty to assess the risks inherent to each investment and to draw their own conclusion:

By investing in the sub-fund, the main risks to which investors are exposed are as follows:

Risks of capital loss:

The loss of capital arises when a unit is sold at a lower price than its purchase value. Unitholders are notified that the capital initially invested may not be returned. The sub-fund has no capital guarantee or protection.

Equity risk:

At least 75% of the GemEquity sub-fund is exposed to equities. If the equities or indexes to which the portfolio is exposed fall, the sub-fund's net asset value may fall.

Risks associated with investments in emerging markets:

There is a risk associated with investing in emerging markets, deriving essentially from the operating and supervisory conditions of these markets, which may differ from the standards prevailing on the major international markets, or political and regulatory factors.

Risks associated with investing in small and mi-caps equities:

As the number of listed securities on small- to mid-cap markets is relatively small, downward market movements are amplified and more abrupt than for large capitalisations. The sub-fund's net asset value may consequently fall more rapidly and more sharply.

Risk associated with the holding of convertible bonds:

The value of convertible bonds depends on several factors: interest rate level, change in the price of underlying shares and of the derivative embedded in the convertible bond. These various factors may lead to a fall in the sub-fund's net asset value.

Risk associated with the investment in high-yield speculative securities:

High yield securities are securities which are rated below BBB- by S&P (or equivalent by major rating agencies) or considered of equivalent quality by the management company, or unrated securities. They are subject to higher risk of default. They may also be subject to significant changes in valuation. They are not sufficiently liquid to be sold at any time at the best price. Therefore, the sub-fund's value may be significantly affected by the fall in the value of high yield securities held in the portfolio.

Currency risk:

This is the risk of a fall in the investment currencies against the euro, the portfolio's benchmark currency. If a currency falls against the euro, it may result in a decline in the net asset value.

Risk arising from discretionary management:

The discretionary management style applied to the sub-fund is based on stock selection. There is a risk that GemEquity may not be invested in the best-performing securities at all times. The sub-fund's performance may therefore fall below the management objective. The sub-fund's net asset value may also show negative performance.

Interest rate risk:

GemEquity has exposure of no more than 25% to fixed-income products. The sub-fund's net asset value may fall if interest rates rise.

Credit risk:

Up to 25% of the sub-fund is exposed to money-market instruments or bonds. Credit risk is the risk that a private issuer's credit quality falls or the risk of default on the latter's part. The value of the debt or bond securities in which the sub-fund is invested may fall, causing the net asset value to fall.

Counterparty risk:

Counterparty risk involves the use, via this sub-fund, of forward financial instruments traded over the counter and/or temporary purchases and sales of securities. These transactions may potentially expose the sub-fund to a default risk of one of the counterparties.

Sustainability risk: It is characterized by an environmental, social or governance event or situation that, if occurs, could have a material negative impact, real or potential, on the value of the investment.

Environmental factors: environmental impact, which may include wafer usage, pollution, waste treatment, energy efficiency, gas emissions and climate change.

Social factors: Human rights, health and safety, working conditions, community impact, diversity, demographic change, consumption patterns and shareholder reputation.

Governance factors: Independence of the board of directors and its diversity, alignment of shareholders' interest with those of managers, remuneration, shareholder rights, transparency and disclosure, ethics or business culture.

Risk related to ESG data:

The fund management team bases its analysis on information integrating ESG criteria, partly sourced from third-party data providers. This information may be incomplete, inaccurate, or unavailable. As such, there is a risk that fund management team may add (exclude) a holding to (from) portfolio based on non-exhaustive, inappropriate, or unavailable elements. The fund management team mitigates this risk by including its proprietary analysis.

### **Capital guarantee or protection**

Nil.

### **Target investors and investor profile**

#### Investors concerned

- GemEquity R unit: all investors.
- GemEquity I unit: intended essentially for institutional investors.
- GemEquity R USD unit: all investors.
- GemEquity I USD unit: intended essentially for institutional investors.
- S-GemEquity USD unit: intended essentially for institutional investors.
- GemEquity K unit: action reserved for the KIPLINK FINANCE Feeder Funds
- GemEquity D unit: intended essentially for institutional investors.
- GemEquity N unit: all investors
- GemEquity MH unit: action reserved for Malakoff Humanis
- GemEquity Y USD unit: intended essentially for institutional investors.

### Typical investor profile

The fund is aimed at individual or institutional investors who are aware of the inherent risks in holding units in such a fund, which represents a high risk due to its investments in equities listed throughout the world.

GemEquity may be used within unit-linked individual variable-capital life-insurance contracts.

GemEquity can be used to support investment in UCITS managed by GEMWAY ASSETS.

The fund reserves the right to invest in UCITS managed by GEMWAY ASSETS.

The units of this UCITS are not and will not be registered in the United States under the US Securities Act of 1933 as amended (the "1933 Securities Act") or listed under any other law of the United States. These units shall not be offered, sold or transferred in the United States (including its territories and possessions) or benefit, directly or indirectly, any US Person (as defined by regulation S of the 1933 Securities Act).

The amount that may reasonably be invested in GemEquity depends on holders' individual circumstances. In order to determine this amount, prospective investors are advised to take into consideration their personal and professional assets and wealth, their cash needs at present and over the next 5 years, as well as the degree to which they are willing to take equity market risks or not. They are also strongly advised to diversify their investments sufficiently so as not to expose them solely to the risks of this fund.

Recommended investment period: more than 5 years

### **Tax regime information**

This prospectus is not intended to outline the tax implications for each investor pertaining to the subscription, redemption, holding or sale of any share(s) of one of the SICAV's sub-fund. These tax implications will vary depending on the prevailing laws and practices in the shareholder's country of residence, domicile or incorporation, and on the shareholder's personal situation.

Depending on your tax regime, country of residence or the jurisdiction from which you invest in this SICAV, any capital gains and income pertaining to the holding of any share(s) of one of the SICAV's sub-fund may be subject to taxation. We advise you to consult a tax adviser regarding the potential consequences of purchasing, holding, selling, or redeeming any share(s) of one of the SICAV's sub-fund according to the laws of your country of tax residence, ordinary residence or domicile.

Neither the management company nor the marketers shall be held liable in any way whatsoever for the tax implications that may arise for any investor as a result of a decision to purchase, hold, sell or redeem any share(s) of one of the SICAV's sub-fund.

The SICAV offers accumulation shares through its various sub-funds. All holders are advised to consult their tax adviser regarding the prevailing regulations in their country of residence, in compliance with the rules applicable to their personal situation (individuals, legal entities subject to corporate tax, other situations, etc.). The rules applying to French resident investors are set by the French General Tax Code.

In general, investors are advised to consult their usual tax adviser or account manager in order to clarify the tax rules applicable to their individual situation.

Under the U.S. FATCA regulation (Foreign Account Tax Compliance Act), investors may be required to provide the UCI, the management company or their agent with information on their personal identity and places of residence (domicile and tax residence), for the purpose of identifying 'U.S. persons' within the meaning of the FATCA. This information may be provided to the U.S. tax authorities by the French tax authorities. Failure by any investor to comply with this requirement may result in the deduction of a 30% withholding tax on U.S. source income. Notwithstanding the procedures carried out by the management company under the FATCA, investors are advised to ensure that the financial intermediary they have used to invest in the UCI qualifies as a Participating FFI. For more information, investors should contact a tax adviser.

# activity report

## GemEquity Annual report – 10th fiscal year 31/12/2022

After 2 years of rise in € (+4.9% in 2021, +8.5% in 2020), emerging markets equities in 2022 sharply fell: -14.8% in € and 20.1% in \$. They kept underperforming the MSCI World equity index (-13% in €), European equities (Stoxx600 at -12.9%, CAC40 at -9.5% in €), American equities (S&P500 at -14.4% in €) and Japanese stocks (Topix at -11.8% in €).

Emerging markets steeply felt in February following the Russian invasion of Ukraine. After a very short rebound, they resumed their declining trend up until October end (end of the China Communist Party Congress). Growth stocks generally underperformed cyclical stocks when facing rising inflation and interest rates (particularly in 1H2022). Chinese stocks also underperformed the overall emerging markets index amidst China regulatory tightening, Beijing zero-COVID policy and deteriorating US China relationship. During the period, the dollar strengthened 6.2% against euro. At the same time, several EM currencies fell against USD (TRY -29%, TWD -10%, KRW -5.6%, ZAR -6.5%, PLN -7.8%, CNY -7.9%, INR -10.1%). Nevertheless, it is worth noting that the BRL (+5.4%) and the MXN (+5.3%) held up well.

During the period, the markets of Latin America, India and the Middle East outperformed the Asian markets (dragged by the large Chinese growth stocks and by Asian semiconductors) and Eastern Europe (Poland being affected by rising inflation and war in Ukraine).

The year 2022 was punctuated by rising global inflation and interest rates, and by a very challenging Chinese environment (zero-COVID policy, low consumer confidence, property woes, politically focused Beijing pre-PCC Congress, US China war climate). Overall, the global economic environment was unfavorable to emerging markets equities, with some of them suffering sharp declines. From November onward, markets in Asia (particularly China) experiment a sharp reversal on the back of the U-turn Beijing policy regarding COVID. But overall, the region suffered outflows in 2022 (see chart below – figures in \$ bn).

Source: EPFR, 28 December 2022.

**In this context, GemEquity declined 25.6% in € (I share) and -26.3% (R share), vs. -14.8% the MSCI Emerging Markets index with dividends reinvested in euros.**

Disappointing performance of our Chinese, Brazilian and ASEAN stock selection added to our overweigh in China and our underweight in cyclicals, in Turkey, South Africa, Chile and Peru have been major drags.

**Since inception, annualized performance has been +5.5% (I share) and +4.5% (R share) vs. +2.3% for the category average and +3.8% for the MSCI Emerging Markets index.**

2022 has exacerbated the last decade bear market that has erased the 2003-2010 bull market of EM over DM. Thus, in relative terms, it appears that emerging markets have not benefited from the excess liquidity offered to financial markets by the major central banks since they embarked on their quantitative easing policy in 2008. **As these same central banks withdrew (at least in part) the liquidity they provided before, it would have been logical to see emerging markets suffering less from these withdrawals. And indeed, that was the case for Latin America and India, but because of what happened in China and in Ukraine, that was not the case for Eastern Asia and Eastern Europe.**

In 2023, monetary environment is about to change. While a pivot to rate cuts does not seem likely in the short term, the fact that both DM (FED, ECB, BOE) and EM central banks (India, Mexico, Indonesia) have slowed down the pace of their interest hikes bodes well for equity markets. Inflation, while still elevated, seems to have peaked. This together with a reversal in USD fortune will make global environment in 2023

vastly different from 2022. However, while inflation risk is fading, recession risk has taken the front stage and lower demand from western economies may affect North Asian tech exports, hence the unprecedented downturn in semiconductors. As global growth weakens, Chinese economy continued to paint a grim picture. Both supply and demand have been hit amid the sharp escalation in COVID cases. The manufacturing PMI fell to 47. However, investors have shifted their attention to post-reopening. After 3 years of self-isolation, China finally announced new guidelines which will de facto reopen borders and abandon quarantines. Although the country struggles with the massive COVID infection wave and the challenge it puts on the medical system, we expect the pandemic to reach its peak before Chinese New Year (22 January) and households' confidence to gradually return from 2Q23. In the meantime, **the economy has troughed and is likely to benefit from re-opening momentum and supportive policies** targeting privately-owned enterprises, the platform economy, and the property sector. Elsewhere in Brazil, state intervention is likely to increase, which does not bode well for economic growth and budget balance. The market has fallen 15% in \$ since Lula's victory and is cheap but uncertainty remains in the short term.

The overall portfolio positioning now favors Chinese equities (39.6% vs. 32.3% for the index), particularly those with a post COVID economic opening angle. We remain relatively cautious on Korea and Taiwan but are warming to semiconductor stocks. We are underweight India based on valuation. In Latin America, we remain broadly neutral but like **Mercado Libre**. Elsewhere, we keep favoring Saudi Arabia of which structural growth is boosted by reforms.

The fund is now 100% invested, of which 68% in sustainable growth stocks and 32% in cyclical stocks.

Bruno Vanier, President of Gemway Assets

# 1 accounting rules and methods

The financial statements are presented in the form provided by the regulation ANC No. 2014-01, amended.

## Methods for evaluating off-balance sheet commitments

Off-balance sheet commitments are evaluated at their commitment value.

The commitment value for futures contracts is equal to the price (in the currency of the UCIT) multiplied by the number of contracts multiplied by the nominal amount.

The commitment value for options contracts is equal to the price of the underlying security (in the currency of the UCIT) multiplied by the number of contracts multiplied by the delta multiplied by the nominal amount of the underlying security.

The commitment value for swap contracts is equal to the nominal amount of the contract (in the currency of the UCIT).

## Operating and management costs

These fees cover all costs charged directly to the Fund, with the exception of transaction fees. Transaction fees include intermediation expenses (brokerage, stock exchange taxes etc.) and transfer fees, if applicable, which may be levied by the custodian and the management company.

The following fees may also be charged in addition to operating and management fees:

- excess return fees. These are paid to the management company if the Fund exceeds its objectives. They are therefore charged to the Fund;
- transfer fees charged to the Fund;
- a share of income from the temporary acquisition and sale of securities.

Fees charged to the UCITS	Basis	Rate
Financial Management fees	Net assets	<u>R, R USD shares:</u> 2,10% incl. taxes maximum  <u>I, I USD, D and K shares:</u> 1,05% incl. taxes maximum  <u>N shares:</u> 1,15% incl. taxes maximum  <u>S USD shares:</u> 0,9% TTC incl. taxes maximum  <u>MH shares:</u> 0,7% TTC incl. taxes maximum  <u>Y USD shares:</u> 0,5% TTC incl. taxes maximum
Management fees other than management company fees (auditors, custodian, distribution, lawyers)		
Maximum indirect fees (advisory fees and commissions)		Not significant *
Transaction fees		For the management company: NIL Commission charged by the depositary: Between 6- and 80-euros including tax depending on the country

Fees charged to the UCITS	Basis	Rate
Outperformance fees	Net assets	<u>R, I, K, N et D shares:</u> 15% including taxes of the Fund's outperformance relative to its benchmark index the MSCI Emerging Markets Index, converted into euros, net dividends reinvested
		<u>R USD, Y USD et I USD shares:</u> 15% including taxes of the Fund's outperformance relative to its benchmark index the MSCI Emerging Markets Index, converted into USD, net dividends reinvested
		<u>S USD and MH shares:</u> Nil

\* the sub-fund investing less than 10% of its assets in other UCITS.

### Outperformance commission calculation method

Calculated according to the indexed method, the outperformance commission is set up over reference periods running from the last net asset value in December of the year to the last net asset value in December of the following year. The reference periods may not be less than 1 year.

Variable part linked to outperformance: 15% including tax of the outperformance of shares as defined below. For the share of the sub-fund denominated in Euros:

The outperformance fee is based on the comparison between the performance of the GemEquity sub-fund's performance and the Notional Asset achieving the performance of the benchmark index (MSCI Emerging Markets Index converted into euros)

Coupon included in Euros over the reference period and recording the same subscription and redemption transactions as the actual fund.

For the share of the sub-fund denominated in Dollars:

The outperformance fee is based on the comparison between the performance of the GemEquity sub-fund's performance and the Notional Asset achieving the performance of the benchmark index (MSCI Emerging Markets Index USD)

Coupon included in Dollars over the reference period and recording the same subscription and redemption transactions as the actual fund.

- If the sub-fund achieves performance above the Notional Asset and which is positive over the financial year, the management company will collect, after deduction of the fixed management fees, an outperformance fee based on a 15% rate including taxes. Note: Investors should note that an outperformance fee will be deducted when the fund outperforms the benchmark, even if the fund records a negative performance.

- In the event of underperformance, this underperformance will be carried over to the catch-up period.

- The variable management fee will only be charged if the net asset value has increased more than the Notional Asset during the year. If the performance since the beginning of the catch-up period exceeds the performance of the benchmark, a provision of 15% of this performance is made.

- The performance fee is accrued at the time of each net asset value calculation.

- The performance fee is paid annually to the management company on the basis of the last net asset value of the financial year and, therefore, the provision is reset to zero every year.

- In the event of redemption of shares by an investor during the financial year, the share of the outperformance fee is paid to the management company and deducted at the end of the financial year.

- Each period of underperformance opens a new period of 1 to 5 years maximum after which, if the 5 years old underperformance has not been made up, it can be forgotten. If another year of underperformance has occurred within this first 5 years period and has not been recovered

by the end of this first period, a new period of up to 5 years opens from this new year of underperformance. Each year of relative underperformance must be made up over a period of 5 years (or less if it is made up sooner).

In the event of underperformance relative to the benchmark, the provision is reduced by the amount of allocations made since the beginning of each catch-up period;

The method for calculating the variable management fee is made available to shareholders.

#### **Accounting currency**

Euro.

#### **Indication of accounting changes subject to special information to unitholders**

None.

#### **Details of the rights and conditions attached to each unit category**

Net income for the financial year is equal to the amount of interest payments, arrears, dividends, premiums and prizes, attendance fees and all income from the securities held in the sub-fund's portfolio plus income from sums currently available minus management fees and borrowing costs.

The amounts available for distribution are equal to:

1. Net income plus retained earnings, plus or minus the balance of accrued income;
2. Capital gains, net of fees, minus capital losses, net of fees, recognised in the financial year, plus net capital gains of the same type recognised in previous financial years which have not been distributed or capitalised, minus or plus the balance of accrued capital gains.

Distributable amounts are fully capitalised, except for amounts subject to distribution required by law.
